

JET RELEASE HIGHLIGHTS

NEW CAPABILITIES AND FEATURES DELIVERED

Over the past year, we've continued to invest heavily in your success, delivering quarterly new releases that deliver productivity, usability, and performance improvements.

Many of these new features have been driven by you, our customers. Feedback and enhancement requests received from customers are vital inputs into our product management team's planning process.

If you are not already on the latest release, download Jet 21.3 from the [downloads page](#) to take advantage of all the latest features.

Here are some of the key enhancements from the past year:

- Consistent Results Sorting for NL First and Evaluate Functions
- Improved Ability to Turn Data-Logging On Or Off
- 40+ Issues Fixed
- Improved Performance
- Enhanced Table Browser
- Bizview Financial Planning and Budgeting Integration
- Connect to Read-Only NAV Databases in Azure
- New Connector for Jet Reports into Microsoft Business Central
- Certification with Microsoft Business Central, 2020 Wave 2
- Simplified Installation Process
- Verified Against Business Central Release Wave 1, 2020
- Enhanced Query Handling for Business Central
- Support for Business Central Multi-Tenant Environments
